Abstract

Recently, in a range of essays, we have cast light unto a topic, which is utterly important, but given its sensitive nature, also deeply suppressed, namely the topic of 21st ct. occult warfare and psychotronic weapons. Now we present a whole framework for researching into this topic, and, not the least, to further the cause of building defensive measures to those frequency-weapons. Much of the knowledge of this topic is closely guarded in top-secret Black Projects among state actors, but also more subterranean in the even more closely guarded Deep State, unconstrained USAPs (Unacknowledged Special Access Programs). The point of this essay is first of all to define a path towards a White Science, White Technologies, than can help in protecting our community from the urgent threat of psychotronic weapons, but also more generally a wish for good people to start questioning the mainstream narrative, and begin to align with and support the White Order, which the Aryan Order represents, so that we may counter the dark forces of occult war, and finally realize the spiritual freedom, which is inherent to all good people. In the essay, we define RISE (theoretical science) and SI (applied science) of the Aryan Academy (AA), while we outline the three layers of defense against the aforementioned advanced weapons. The essay is also a call out the White Order to support the AA and the ADRP, which is crucial, if we ever want to succeed in bringing about a new ethereal Atlantis.

Author's preface

The *Aryan Defense Research Program (ADRP)* represents a decisive step in the formalization of the Academy's research agenda. Conceived as a flagship initiative, ADRP seeks to address one of the most urgent challenges of the contemporary occult war: the systematic deployment of psychotronic technologies against human consciousness and spiritual integrity.

This program is pioneering in two respects. First, it integrates theoretical inquiry into the laws of aether and spiritual energies with applied engineering of concrete defensive systems. The dual structure of RISE (Research Institute for Spiritual Energies) and SI (Spearhead Industries) ensures that conceptual models are not left abstract, but are continually tested, refined, and embodied in operational technologies. Second, it introduces a layered doctrine of defense—Shielding, Counter-Measures, and Eradication—which mirrors both military depth strategy and metaphysical law.

ADRP is not only a technical project but also a research paradigm. It seeks to establish methods for detecting, analyzing, and neutralizing psychotronic signals, while also restoring metaphysical balance through Vril-based resonance. In doing so, it bridges domains often kept artificially separate: physics and metaphysics, science and spirituality, defense and theology.

The broader significance of ADRP lies in its role as a template. By demonstrating how theory and application can be structurally linked in the service of esoteric defense, ADRP provides a model for future Esoteric Research and Development Programs (ERDPs) across the Academy. Its methods and results will thus not only contribute to immediate protection, but also advance the long-term task of recovering suppressed sciences of the aether and realigning them with the higher order of spirit.

This document, therefore, should be read both as a research charter and as a manifesto of methodology. It outlines the challenges, the institutional framework, and the layered strategies that will guide our work. In doing so, it opens a new field of study: the systematic defense against psychotronic warfare, grounded not in speculative claims but in a rigorous synthesis of theory and practice.

The nature of psychotronic warfare and the need for building a defense

This essay is a follow-up to our previous essays (Riis-Søndergaard, 2024a; 2025a; 2025b) on the very real and urgent threat of psychotronic warfare in the 21st ct.. In the Aryan Order (AO), we are, being the Hyperboeran Siddhas (perfected, liberated masters), at the forefront of this occult techno-war, which has been ongoing since the Second World War. Interestingly, the war is primarily an invisible war, for who could legitimize attacking the light-bodies, Kundalini and crown-chakras of the Aryans (the free, noble, pure and elevated spirits)? What is going on in the wake of the 2WW is a massive crime against justice and against all noble and free beings of earth. In the previous essays, we have outlined the historical developments of these Black Projects, we have sketched an analysis of how these psychotronic weapons are being used, and we have outlined our initial considerations as to how we can defend ourselves against these awful weapons, which primarily target the crown-chakras, but given what we know of spiritual energies (Riis-Søndergaard, 2024b), we can easily conclude that the whole spiritual energy system among our leaders is being targeted, perhaps by various means. It is the goal of this essay, as an initial culmination of our research into the topic, to outline a long-term and ambitious research program capable of bringing about defensive measures to these kinds of weapons, for should we not of course protect ourselves against such a nefarious conspiracy as psychotronic weapons? Of course, we should, and it is the right of all beings to defend themselves against unjust attacks. In a recent essay (Riis-Søndergaard, 2025b), we have outlined an initial prototype, the Virya Etheric Resonator (VER-1), for countering frequency-weapons of the sort we are fighting, but in this essay, we will define an actual research program in regards to the levels of defense that might be necessary to counter the massive aggression of psychotronic weapons. Remember, our adversaries are deeply ingrained in the Deep State and preside over large swaths of finance and industry to carry out their crimes, so we must think in long terms to construct the Aryan Academy (Riis-Søndergaard, 2025c; 2025d) and to level the playing field with these dark operatives of the Deep State by steadily building our order and movement, the White Order (Riis-Søndergaard, 2025e; 2025f). The stakes are high, the war is existential, for we are fighting not against flesh and blood, but the principalities of darkness and wickedness in high places. We understand psychotronic weapons to not only interfere with the psyche (soul/consciousness), but also the actual spiritual energies of the Aryan soul, as we have mentioned. One thing is to attack the consciousness of a noble being, which has been ongoing since forever in the occult, magical war, but another thing is to levy technology to directly attack the spiritual energies themselves, the flows, vibes, frequencies and very structure of the crown-chakra and light-body, which is why we call this kind of aggression techno-sorcery. This can never be tolerated and must be combated by all means, for those energies are absolutely sacred to the Hyperboreans, and it is really unbearable to have those energies attacked, for it affects the whole energetic system of a Siddha under attack, not to mention the very real aspect of our collective psyche and energies, for do remember, the true Aryans are not that many, contrary to what the newspeak term, Indo-European, would imply, we estimate between 10.000 and 100.000, but we are a divine collective and share a collective, ethereal psyche, energetic system and life. An attack on one of us is an attack on all of us, as the Musketeer-oath goes. As Hyperboreans, we are firmly convinced that it is our duty to lead the good mankind into a new golden age, a new ethereal Atlantis, to build the Aryan Nation, and to finally conquer and defeat evil on earth, as is the promise of the Vedas and the Edda. To that end, we are building the Aryan Academy (AA), and our flagship-project, the project we will begin with, is the ADRP, which we here define, for the threat is ongoing and urgent, so together with all the Viryas (wise warriors) of the world, we have a lot of important work to accomplish during the next many years. The promise of mankind is, to be sure, spiritual enlightenment and liberation, and it is this we want to be known for, rather than as war-criminals and whatever else epistemic injustices have been projected upon us as a race in recent times.

Research Institute for Spiritual Energies (RISE) and Spearhead Industries (SI) – Theoretical and applied science divisions of the Aryan Academy (AA)

To advance the ADRP, we are actively in the midst of defining, conceptualizing and constructing RISE and SI, which are both crucial for the wider project of building the AA. The AA is many faceted, but these two institutions are what is going to defend the Aryans from this covert aggression in the invisible and unacknowledged war that is ravaging the world today. There are no signs that our enemies are about to end their nefarious and malevolent conspiracy, they seem to be hell-bent, for the attacks have been ongoing since the mid-80s, so it is up to the Siddhas and Viryas to unite and to further the cause of the White Order. We now wish to present the initial setup of our theoretical (RISE) and applied (SI) science divisions of the Aryan Academy. We are determined to realize this project and to for the first time in the history of mankind, at least officially, for the science we seek might already be known, only in Black Projects of our adversaries, at least partially, for who could know the aether better than the Hyperboreans themselves, uncover and *empirically prove* the reality of the divine metaphysics, spiritual energies and the transcendental aether. Here is a diagram, explaining the different modalities of RISE and SI:

Aspect	Research Institute for Spiritual Energies (RISE)	Spearhead Industries (SI)
Primary Role	Theoretical research into spiritual energies, aether, and metaphysics	Applied science & engineering of devices, prototypes, and tactical systems
Core Goal	Uncover and systematize hidden laws of aether, Vril, and metaphysical order	Translate discoveries into practical defenses, technologies, and field applications
Orientation	Contemplative, investigative, hermeneutic	Pragmatic, experimental, technological
Methods	Philosophical analysis (Heidegger, esotericism, metaphysics) - Aether theory modeling - Study of chakras, aura, psychotronics - Meditation, phenomenology, symbolic hermeneutics	Device prototyping (VER-1, shielding systems, jammers) - Materials testing (crystals, metals, frequencies) - Tactical field experiments - Engineering counter-measures
Outputs	Theories of aetheric dynamics - White Papers & Essays - Doctrinal models (Aufheben, Aletheian Method)	Functional devices (shields, emitters, detectors) - Operational protocols - Defensive & offensive psychotronic strategies
Time Horizon	Long-term: uncover universal truths of aether and Spirit	Short-term to mid-term: immediate defense solutions
Relation to ADRP	Provides the conceptual models for shielding, countering, and eradication	Builds and tests systems based on RISE's models; deploys them in practice
Esoteric Dimension	Guardian of gnosis, unveiling of divine metaphysics	Guardian of praxis, embodiment of divine will through tech
Slogan	*"To Know the Aether."*	*"To Forge the Blade."*

As we move forward with the AA and the ADRP, we foresee that we will gain massive victories towards liberating mankind from the thralldom of materialist ideology. For example, we envision a day, when all people are able to monitor their spiritual energies neatly etc. – a new ethereal Atlantis.

Three aspects of a defense – Shield, counter-measures and eradication

Let us now present our vision for constructing defensive measures to psychotronic aggression. We envision a threefold layer of defense, which is in correspondence with the logic of signals-warfare:

Layer of Defense	Logic
I. Shield	Deflect / Reflect the Signal
II. Counter-Measures	Negate / Neutralize the Signal
III. Eradication	Destroy the Source

Let's continue by detailing and analyzing the logic of each of these three layers. Of course, we want to implement the most efficient, least costly and least aggressive defensive measure, but all the levels are worthy of considering, and might be necessary to develop. The logic of our research program is that if it is possible to build weapons to attack the crown-chakra, it is of course also possible to defend against such an attack, hence the logic of the threefold layer of defense. The three layers correspond to an increasing level of warfare activity, where we begin with passive deflection, then move on to actively negating the signal, and finally we destroy the source – increasing levels of warfare. The shield is perhaps what is most important, for if we can build a shield it can be implemented as a standard for individuals and settlements alike in a most efficient way, making war-escalation unnecessary. Destroying the source would no matter what be more costly in terms of military activity, though it might be the ultimate solution, though then perhaps not in a military sense, but more in the sense of civic uprising and dismantling of the whole global psychotronic warfare infrastructure by law and international settlement, which of course is our ultimate hope, but we need to get started in defending ourselves, so here is a detailed outline of the three layers:

I. Shield (Deflect / Reflect)

- **Concept:** Establish a protective field around the individual (or group) so that incoming psychotronic signals are *bent, scattered, or reflected*.
- **Physical Analogy:** Faraday cage, reflective materials (metals, crystal lattices), frequency mirrors.
- **Metaphysical Analogy:** Aura-shields, mantric resonance, etheric "mirrors" that bounce the attack back to sender.
- **Strengths:** Passive, continuous protection; non-aggressive; preserves energy of the defender.
- **Weaknesses:** May be overwhelmed by sufficiently strong or adaptive attacks; requires constant maintenance.

II. Counter-Measures (Negate / Neutralize)

- **Concept:** Directly *interfere* with the hostile frequency by producing its negating opposite, or by scrambling it so it cannot "lock on" to the crown-chakra.

- **Physical Analogy:** Noise-cancelling headphones (inverted waveforms); jamming signals; phase cancellation.
- **Metaphysical Analogy:** Chant, breath, or device that emits harmonics that "cancel" the psychotronic waveform.
- **Strengths:** Active defense, can adapt to new forms of attack; potentially scalable to larger areas.
- **Weaknesses:** Energy-intensive; requires accurate detection of enemy frequencies to produce effective counter-signal.

III. Eradication (Destroy the Source)

- **Concept:** Instead of blocking or cancelling, trace the attack back to its origin and *disable/destroy the transmitter* — physical or metaphysical.
- **Physical Analogy:** Electronic warfare strike, hacking, EMP counterattack.
- **Metaphysical Analogy:** Directed will or ritual (blade, Vril-strike) to cut the source of inversion at its root.
- **Strengths:** Eliminates the threat entirely; preemptive strike potential.
- **Weaknesses:** Requires intelligence and precise location of source; escalates conflict; may draw retaliation.

IV. Strategic Logic of the Three Layers

- These three options form a graduated defense doctrine:
    - **Shield** = survive the attack.
    - **Counter-measures** = disrupt the attack.
    - **Eradication** = end the attack.
- In military terms, this is like defense in depth: layer 1 is perimeter armor, layer 2 is active defense, layer 3 is offensive counterstrike.
- In metaphysical terms, it mirrors the Trikaya model (body, speech, mind): shield (body/outer defense), counter (speech/sound/frequency), eradication (mind/will-strike).

This is idea of how we can effectively defend ourselves from those heinous crimes, which we are currently the targets of. As we said, in the long term, the world need to be absolute freed from this type of aggression, so ultimately it will take a civilizational revolution, the White Order, to settle the issue for good, which is our strategic goal, but these three layers, which we have here described, is a start, and we really need that start now, for no longer will we accept these intrusions and interferences in our spiritual energies and psyches.

Developing the defense – The research programs of RISE and SI defined

Let us now describe how to go about researching into and developing these technological defenses, mentioned in the previous section. Where we in the previous section described the logic of the three levels of defensive measures, we will now describe how the research into these levels of defense will be carried out in RISE and SI respectively. The two institutions are necessary divisions of the same project with the goal of researching metaphysical science, proving spiritual energies and building applications to monitor spiritual energies, while defending against psychotronic attacks. They work jointly to this effect.

Core mission:

1. Study and empirically prove the aether and spiritual energies – dissemination of spiritual knowledge.
2. Develop layered defenses against psychotronic warfare targeting crown- and other chakra function, as well as light-body and Kundalini etc..
3. Preserving Vril integrity of the Aryan collective.

Let's now take a deep look at each of the three layers of defense with clues as to how to go about the research and development of each layer:

I. Shield (Deflect / Reflect)

Objective: Passive protection from incoming signals.

- **RISE (Theoretical)**
    - Research aetheric "mirror" dynamics (how waves reflect in subtle fields).
    - Study crystal lattices, metals, and organic materials as possible aetheric deflectors.
    - Develop models of aura-strengthening through meditation, mantras, and geometry.
- **SI (Applied)**
    - Construct experimental shielding devices (layered metals, crystals, plasma barriers).
    - Test wearable shields (pendants, helmets, cloaks) and environmental structures (Faraday-like sanctums).
    - Integrate VER-1 principles for self-generated shields.

II. Counter-Measures (Negate / Neutralize)

Objective: Actively disrupt or cancel hostile signals.

- **RISE (Theoretical)**
    - Map psychotronic frequency spectra and identify signature waveforms of interference.
    - Study phase cancellation, resonance, and "aetheric jamming."

    - Develop mathematical models of counter-harmonics, including mantra/harmonic sound.
- **SI (Applied)**
    - Build counter-signal emitters (scalar field generators, audio-harmonic devices, phased arrays).
    - Test active jamming systems for individual and group defense.
    - Explore biofeedback systems to automatically detect and respond to attack.

III. Eradication (Destroy the Source)

Objective: Eliminate origin of psychotronic attacks.

- **RISE (Theoretical)**
    - Research techniques of remote sensing / aetheric tracking to locate sources.
    - Develop "signature tracing" methods: following inversion currents back to origin.
    - Investigate metaphysical strategies (directed will, ritual strike, Vril projection).
- **SI (Applied)**
    - Engineer systems to disrupt or overload enemy psychotronic emitters.
    - Explore EMP or directed-energy counterstrike prototypes.
    - Operationalize Vril-blade practices into tactical protocols.

IV. Integration & Training

- Joint RISE–SI cooperation in simulations, testing, and doctrinal refinement.
- Training protocols for White Order operatives in Layered Defense Doctrine:
    1. **Shield first** (survival).
    2. **Counter if needed** (neutralize).
    3. **Eradicate when possible** (offense).

This way ADRP is modular, progressive, and holistic: each branch (Shield / Counter / Eradication) has both a theoretical arm (RISE) and an applied arm (Spearhead).

In another essay of ours, we have spoken more generally about the topic of occult physics (Riis-Søndergaard, 2025g). That essay is also important, if one wants to get up-to-date on the research and theses of the Aryan Order, and as to how we define the aether vs. the astral realm etc..

ADRP as a flagship-project of the AA – A call for our allies to support the Academy

The outline of the research program we have made in this essay should be a great starting point for all our fellow researchers interested in supporting the AA and the ADRP. We ave set the goals in the form of the three layers of defense, and we have described the joint collaboration of our theoretical and applied science divisions in developing such a defense. This is only the beginning, but since not many of us in the AO are especially educated in physics, we basically have to start from scratch and envision a whole program development to the effect of being able to build technologies that can help us in protecting our community. Therefore, our essays on this topic is also a call out to our allies in the White Order, especially to those, who might be skilled in physics and technological development for military application regarding advanced psychotronic weapon-systems (that might not only be about electro-magnetism, but also about scalar, torsion and quantum physics). In this initial phase of our program, we could really need the expertise on these matters to reach out to us with insights and proposals as to where our research could go. Of course, we will also continuously proceed with educating ourselves on these topics, for the stakes are the highest, to be precise. Never will we let our people and leadership be attacked by such nefarious technologies, so we are dedicated and determined to carry out our mission, no matter how long it might take. But of course, as we educate ourselves, we also need the scientific infrastructure necessary to carry out our investigations, research and development into a topic, which we foresee will be crucial to the new spiritual world we are envisioning. Would it not be great to finally prove those spiritual energies of mankind, which we absolutely know to exist, but the knowledge of which is guarded in the most strict sense in the Deep State Black Projects? Is this not the "final frontier" of mankind, if we want to succeed in ushering in a new ethereal Atlantis for the whole White Order? Of course, the Black Order is hell-bent on keeping this knowledge hidden and controlled for dark purposes, but this should not stop us, right, from making the greatest discovery of mankind yet: that life is divine and absolutely spiritual? We should not tolerate the suppression by the Black Order of the spiritual sciences, a suppression, which is taking place on multiple fronts. Is the psychotronic aggression against the AO leadership today, as we speak, not the ultimate hypocrisy and heresy imaginable? They utterly deny the spiritual, mystical reality, while they fiercely attack the most divine crown-chakra of the awakened Siddhas. What a failure of the current world leaders, not to defend the AO against those severe attacks, while they plan for war with Russia, probably our greatest state ally in the White Order, since according to our intel, Russia has refused to implement the otherwise global psychotronic control-grid. These are some of the critical questions we would like our readers to contemplate, but of course first and foremost we would like our readers to start meditating upon the aether and the Holy Spirit, so as to find clues in their own hearts, as to the divine nature of creation, for which we fight. The AO can guarantee the whole White Order that we are utmost dedicated to the Great Cause, the Great Work, and that in time we will be successful, for this is the destiny of the good mankind. So we urge all our comrades to align with the White Order and to support the construction of the AA and the ADRP so that we might make imminent progress in this program of self-defense. Most governments are nowadays probably compromised somehow, and many world leaders claim to represent the New World Order of technocratic, technetronic control, but this is not the only alternative. The AO/WO represent true spiritual enlightenment, liberation and salvation, what the devil could never achieve. To this end, we wish to study and prove the spiritual energies, for those energies are actually also *collective energies,* a reality, which is deeply suppressed, for example the collective aspect of the Kundalini-energy. Therefore, we need to study those energies, so that we might prove them for the world, and for the world to finally pay attention to what the Hyperborean Siddhas have always professed: that existence is deeply spiritual and mystical, and our goal is spiritual liberation. Is the current occult war of the 21st ct. and psychotronic weapons not proof enough?

Glossary of key terms

ADRP (Aryan Defense Research Program)
The flagship research and development program of the Aryan Academy, focused on countering psychotronic warfare through shielding, counter-measures, and eradication strategies.

RISE (Research Institute for Spiritual Energies)
The theoretical branch of the Academy. Dedicated to investigating the metaphysics of the aether, spiritual energies, and the laws of Vril. Provides conceptual models and doctrinal grounding.

SI (Spearhead Industries)
The applied branch of the Academy. Translates theoretical discoveries into prototypes, devices, and operational systems. Responsible for practical defense technologies and field protocols.

Psychotronic Warfare
The use of directed frequencies, fields, or energies to manipulate, disrupt, or damage human consciousness and spiritual integrity. Targets often include the crown- and heart-chakras.

Crown-Chakra (Sahasrara)
The spiritual energy center located at the top of the head, associated with consciousness, higher perception, and divine connection. A primary target of psychotronic assault.

Heart-Chakra (Anahata)
The spiritual energy center of love, will, and unity. Interference here attempts to disrupt both personal vitality and collective solidarity of the Hyperborean lineage.

Vril
The subtle force of divine will that animates life and consciousness. Seen as the operative essence of the aether. Harnessed in both self-defense (VER-1 Prototype) and directed counter-strikes.

VER-1 Prototype (Virya Etheric Resonator)
An experimental device developed to amplify and harmonize individual aura-fields, increasing resistance to psychotronic attacks and enabling better navigation of the aether.

Shielding
The first defensive layer in ADRP. Techniques to deflect or reflect hostile psychotronic signals before they penetrate the aura or chakras.

Counter-Measures
The second defensive layer in ADRP. Active systems that neutralize or cancel incoming signals through frequency inversion, resonance disruption, or energetic harmonics.

Eradication
The third defensive layer in ADRP. Strategies to trace attacks back to their source and disable or destroy the emitting system — physically or metaphysically.

Veil of War
The metaphysical concealment of the ongoing occult war, enforced through denial, inversion, and materialist ideology. Prevents public recognition of psychotronic aggression.

USAPs (Unacknowledged Special Access Programs)
Hidden state or corporate programs dealing with black technologies, often involved in psychotronic or aetheric weaponization.
