

THE ARYAN X-FILES

INVESTIGATIVE INDEX AND INTEL OPERATIONS OF THE
ARYAN INTELLIGENCE SERVICE

Note on the cover-image: The image is taken from the Danish author, Martin A. Hansen's novel, *The Liar*. But during a breakthrough to The Other Side, the image depicted two crossed hands, writing from opposite directions, like a palindrome. The mystery of the occult Other Side is part of our investigation.

The Aryan Quest

The Criminal Investigation

The Resistance

Main intel operations and investigative studies of AIS

Notes on agenda

Abstract

This essay seeks to answer the crucial question: What is the true military-strategic situation of the post-modern world? If we seek to understand what truly moves the world and what is at stake, we have to take a deep dive into the muddy waters of occult warfare. Why is the war occult? Because everything, from worldly power and truth to spiritual liberation and the destiny of mankind, is at play. So we are playing with the highest cards here, which we seek to prove and inform our allies of. We present the investigative index of the Aryan Intelligence Service (AIS), which has been working tirelessly since 2020 to establish a sound resistance to the nefarious plots of the global Deep State that today wields a lot of power. We present the core of the AIS program via three topics with the main sub-points of investigation and program development. First, the general idea of the Aryan Quest is presented, which gives the metaphysical context for the occult war. Then we present the criminal investigation to inform our readers what we are up against, before we present the idea and strategy of the resistance we are building. Furthermore, we describe the main intel operations and investigative studies of AIS. We don't present this perhaps controversial essay to incite conflict, but rather to cast true illumination on what is at stake in post-modernity, so that good people can make an informed decision, rather than continue to be kept in the dark by the forces who cannot stand the light. What we fight for is spiritual enlightenment and liberation, so may that be the cause.

Author's preface

This essay is a symbolic and scholarly exploration of metaphysical warfare and spiritual resistance. Terms such as “Order” or “Intelligence Service” are used metaphorically to describe an esoteric research framework, not political or military organization. The project is committed to peaceful scholarship and non-violent spiritual practice.

The Hyperborean Academy is devoted to the peaceful pursuit of spiritual science, comparative metaphysics, and the defense of the soul in an age that often denies its very existence. Our work arises from lived experience, contemplative practice, and rigorous reflection on the history of philosophy, religion, and esoteric traditions.

Through the framework of the Aletheian Method, we affirm that genuine knowledge is not limited to what can be measured empirically, but also includes the unveiling of truth through higher consciousness, conscience, and spiritual transformation. In this light, we investigate themes such as the nature of the aether, the role of consciousness in creation, and the perennial struggle between forces that obscure or liberate the human spirit.

We stand firmly for truth, love, and justice, and we reject all forms of hatred, coercion, or violence. Our mission is not political, but spiritual: to preserve and transmit wisdom, to defend the integrity of spirit, and to offer a path toward enlightenment and liberation.

The Academy invites open dialogue with scholars, seekers, and all who share in the quest for a higher understanding of existence.

Spiritual, occult warfare and the Aryan X-Files

This essay is a presentation of the main index of investigative files of the Aryan Intelligence Service (AIS), a catalog, which defines the ongoing investigations of AIS. AIS was established in 2020, after the Aryan Order (AO) and the International Defense-force of Aryans (IDA) were formed in 2017. The essay gives an overview of the most important topics for understanding the occult war of the 21st ct., from the viewpoint of the IDA. Remember, we are a peaceful organization, but we seek to protect ourselves from the dangers of the psychotronic warfare carried out by various Black Projects and nefarious organizations worldwide, especially targeting the ethereal Aryan race. Of course, we have many more research topics and projects in AIS than presented in this essay, but we have set up this index to give an idea of the operational side of IDA – the topics here presented are the core of our program. The essay is primarily written for IDA/AIS, but also for all our allies, who one way or another seek to support the IDA in our fight for freedom and justice. The information we present on these projects is based on true, mystical experience, but they are ongoing projects under active investigation and development. Given the seriousness of the military-strategic situation, we find that the time is right for us to unveil the basics of this important and defining AIS program. It is important to remember that we present this information on the true nature of the occult war, not to incite to any kind of violence, but to reveal the reality, which the current powers-that-be fear so much that they “dare not speak about it”, as Kennedy (1961) said. In the essay, we will even speak about such a cutting-edge notion as time-travel, perhaps not in a physical sense, but in a spiritual sense. Remember, the investigations are still ongoing and will not end before we are successful in defending ourselves and reaching our strategic goals of a new ethereal Atlantis. Here is an overview of the core program of AIS:

- 1. The Aryan Quest**
 - a. The Mysteries
 - b. The Holy Grail
 - c. The Spear of Destiny
 - d. The Historical Equalization – Martin A. Hansen’s *The Liar*
- 2. The Criminal Investigation**
 - a. The Fugitive
 - b. Metamorphs with Computers
 - c. Tesla-towers – Psychotronic Weapons
 - d. The Other Side
- 3. The Resistance**
 - a. The Struggle
 - b. Resistance to Skynet
 - c. Blue Tone Military Headquarter
 - d. 2048 – Aufheben

Having given the outline, we will now proceed to a detailed description of each of these points. Again, remember that the information here presented is cutting-edge and based on the mystical experiences of the collective AO, and as such the information is defining for the present occult war in the 21st ct..

The Aryan Quest

The topic of The Aryan Quest gives an overview of the general worldview and strategic goals of the AO. Remember, temporal existence is a cosmic war between the forces of light (Siddhas and Viryas) and darkness which we describe in many of our essays – we call this notion *the temporality of war*.

a. The Mysteries

- What is the cause and nature of creation? What is the origin and nature of man? These are perhaps the two most important topics we investigate on this point. Today, in mainstream science and education, Darwinism is seen as the unquestionable, self-evidential truth, but we beg to differ. As Theosophy explained (Blavatsky, 2007), if we seek to understand these questions, we should look not only at the one part of the equation, namely material evolution, but also and primarily on the spiritual origin, nature and evolution of creation and mankind. This is crucial, if we seek to understand the rest of the AIS investigative program and the cosmic war itself. For the Aryans, the Vedas are the transcendental, eternal tale of the *triumph of the heart*, and it's through the prism of the ever-evolving Vedas that we understand the creation mysteries.

b. The Holy Grail

- Much has been said about and speculated upon in regards to the mysterious concept of the Holy Grail. We know the concept was used by the Knights Templar, and we consider the inspiration for this concept to be found in Hyperborean/Aryan lore and legend, which has permeated and still does much of European myth. As it is told in the Grail-legends, the concept refers to the idea of *divine love and ascension* – the true motif of Hyperborean legend and mythology. For The Aryan Quest, this gives the necessary orientation for us to understand what we ultimately fight for in temporality, namely *Aufheben*.

c. The Spear of Destiny

- This is yet another mysterious concept with roots in Hyperborean legend. For us, the concept does not exactly refer to the spear of Longinus that pierced Christ, but instead refers to the spear of Odin, which pierces the veil of *Maya*. These two ideas of the Spear might have been conflated. But for us, it refers to the act of seeing through the veil of temporal, mundane, physical reality and seeing beyond to another dimension, namely the transcendental, ethereal reality of the Aryan race – another crucial concept for the AO in our pursuit of spiritual enlightenment and liberation. As a Hyperborean, Odin was known to be a seer, so the concept refers to the notion of mystical vision and clairvoyance.

d. The Historical Equalization – Martin A. Hansen's *The Liar*

- We use the reference of Hansen's novel to refer to the novel idea of writing time, temporal existence, from *back to forth and forth to back* simultaneously. It's a novel idea of how time and existence is created and unfolds, where the transcendental plane is given ultimate precedence. It is a form of historical determinism and proof of *telos* and divine providence, though at the same time, not interfering with free will, for the Aryans do indeed exist primarily on the transcendental plane. This is a highly occult notion, which we are actively exploring. We also call this concept the *historical equalization*. In one of the editions of Hansen's novel, the cover depicts two crossed arms, simultaneously writing from each side, like a palindrome. The world is "*a lie*", for the tale is constantly being written, transformed.

Having given the basics of the AO worldview, we will now present the criminal investigation.

The Criminal Investigation

The criminal investigation is necessary, though of course uncomfortable, for believe us, we are truly fighting some “dark forces”, as the Russian geopolitical strategist, Alexander Dugin, said, when his daughter was brutally killed. We will now present the core ideas of the criminal investigation of the AIS;

a. The Fugitive

- What we call The Fugitive is the arch-demon, a vampiric entity, which Nimrod de Rosario (1985) and other esotericists/Gnostics calls *the Demiurge*. The reason we call it a fugitive is that it is always on the run from justice – it seeks to hide its crimes, while being responsible for all the world’s lies, ills and sorrow. In occult dreams, we have seen the Demiurge depicted as a statue outside a cathedral, bent over forward while running with its arms flickering to the sides – hence a fugitive. We have also heard in occult dream visions that it specifically calls itself a vampire responsible for building “a bureau” that have assimilated all the world’s elite for its cause. It is a terrifying phenomenon, but since the AO was founded in 2017, we have had ample, continual evidence that such a character do indeed exist. Also known as Satan, the enemy of Heavens and the Aryan race, the cause of the temporal, existential war.

b. Metamorphs with Computers

- Despite being the ultimate cause of hatred, aggression, lies and violence, The Fugitive is not alone in its crimes – there are dark beings complicit in its crimes against humanity. These are *the metamorphs*. They are metamorphs, also known as vampires, because *their ethereal form cannot hold*, when confronted with the divine light, because they are liars and their hearts have darkened – they have existentially transgressed against divine order and the truth and law of the heart. Specifically, it is their noses that shape-shift. We have ample, experience-base evidence that these nocturnal creatures exists and walk among us, as is depicted in the classic film, *They Live* (1988). We have been told that these dark creatures are the ones responsible for building and operating the psychotronic Tesla-towers, targeting the ethereal Aryan race, hence the term “metamorphs with computers”.

c. Tesla-towers – Psychotronic Weapons

- The jumping point of today’s occult war is the existence of psychotronic Tesla-towers – advanced weaponry that targets the light-bodies, crown-chakras and collective psyche of the Aryan race. These towers, and perhaps other similar dark technology, have apparently been build in a sub-dimension to the physical dimension, called the Other Side, which we have explored in previous papers on occult physics and psychotronic warfare (see Riis-Søndergaard, 2024a; 2025a; 2025b; 2025c; 2025d). The main fight today is to be free from these types of long-distance, perhaps inter-dimensional, invisible attacks on the astral realm.

d. The Other Side

- Finally, we will describe the idea of The Other Side, a sub-dimensional, fallen realm, where we speculate some dark beings are able to operate and alter reality. We have described this idea in two previous papers (Riis-Søndergaard, 2025c; 2025e). See those two papers, where we correlate the evidence we have of this dimension with other metaphysical traditions.

Having presented the core notions of the criminal investigation, we will now turn to the resistance.

The Resistance

We will now present the core ideas of the resistance. See also our essays on the White Order and our general masterplan (Riis-Søndergaard, 2025g; 2025h).

a. The Struggle

- For the AO, since our awakening and gathering, but actually since forever, it's a daily struggle to be free from the tyranny of black magic and psychotronic aggression. It seems like we are fighting a bio-techno-systemic, demonic hive, which has connected its hive-mind to the psychotronic weapons targeting our collective psyche, hence why we call this "techno-sorcery" (Riis-Søndergaard, 2025b). But the occult war is being played out on multiple (all) fronts, for the forces of darkness are hell-bent, as we describe in another essay (Riis-Søndergaard, 2025f) on occult geopolitics. The plot we describe in this essay is deeply occult – the war is being played out underneath the radar of most regular people, but the reality and seriousness of this war does not not become even the most important and urgent for that reason. The war is the true reason for the reality of so-called Deep State and Black Projects – this is what is really going on, and as true Aryans we can absolutely vouch for that.

b. Resistance to Skynet

- The primary objective of IDA/AIS is to defend against psychotronic weapons, what we call the Skynet, and to guard all Aryans against any form of attack. This does not mean that we are violent at all, but we have the right to self-defense, to defend ourselves against those vile and serious attacks on our very soul-fabrics, don't we? Just because the reality of the war is denied by the current powers-that-be, doesn't mean that it is not taking place. Acknowledging the occult war would mean that the powers-that-be would lose their legitimacy as rulers of the world, for they would then in the same equation have to acknowledge the very divine nature of creation and the ethereal Aryan race. The Aryans, of whom there are not that many, we estimate between 10.000 and 100.000, are the Hyperborean Siddhas (perfected, liberated masters), and from the Vedas we know that history has always moved towards this final point of resistance to Skynet.

c. Blue Tone Military Headquarter

- To further the resistance, we have plans to develop the Blue Tone Military Headquarter, where we will experiment in spiritual time-travel. It might seem impossible, but the reason we call it Blue Tone is that in the first years of our awakening, some of us experienced receiving "transmissions from the future", which were accompanied by a deep, "blue" tone. The transmissions told us that we should organize the Aryan race, and that our primary mission was to build a defense against psychotronic weapons. We can tell you much more about the occult war, but this information on the Blue Tone is probably some of the most occult and controversial yet.

d. 2048 – Aufheben

- Finally, we will shortly describe the end-game and the ultimate goal of the AO. As opposed to the proposed technological singularity of the current political elite taking place in 2045, the Aryans foresee and envision the final Aufheben, the absolution of temporality and the return to our transcendental origins, in the year 2048. This is the end-game – the eschatological battle for the destiny of mankind.

Main intel operations and investigative studies of AIS

We will now present a list of the main operational and study projects of AIS, as they pertain to ongoing intel operations and intel gathering. We find that it is important to share this information with the academy in general, for we are not out for conventional war in any sense, we are not subversive, but we do adhere to a doctrine of epistemic warfare for the hearts and minds of men – for the soul of mankind. Therefore, our operations are meant to illuminate truth, justice and freedom. Our operations and studies are more of a spiritual enlightenment campaign than any political agitation. We will now present the current intel operations and intel studies we are carrying out in AIS:

A. Intel Operations

1. Epistemological Warfare Division (EWD)

- The main operational program of AIS is the EWD-doctrine. The task of the EWD is to carry forth the torch of truth, justice and freedom in a world darkened by falsehood and inversion. We teach our operatives to be vigilant, both in the inner (mental) and outer (public) discourse. The epistemic warfare is carried out in the inner sanctum of the heart, but also in public discourse, where truth and semantics are contested. Their main tactic of EWD is to connote truth and eradicate error. For this, we have developed the concept of the Stratagem, which we will talk about next.

2. The Stratagem

- Stratagem means “cunning of warfare”, and we have developed and applied this concept specifically to the epistemic warfare of EWD. In our original conceptualization, the Stratagem consists of three elements descending through the macro, meso and micro-level of engagement: 1) Discourse, 2) Epistemic Front and 3) Confrontation. You can read more about the Stratagem in a range of our essays, for example in Riis-Søndergaard (2022a), where we outline the idea.

3. Geopolitical Strategy

- An important task of AIS is to analyze and develop strategy for world geopolitics and international relations. Of course, we are interested in conventional geopolitics, matters of peace and war, but what we investigate the most is the spiritual, occult dimension of geopolitics, for example as it pertains to the worldwide resistance to the global Deep State, Black Projects and psychotronic weapons, and the building of a White Order, named after the blessed and holy ethereal day. You can read more about this topic in Riis-Søndergaard (2025f; 2025g). This program is also about proliferating Vedic culture among our allies.

4. The Weather Wars

- The Weather Wars refer to the ethereal/astral struggle between the forces of light (Siddhas and Viryas) and the forces of darkness (the Fugitive and metamorphs). The program deals with establishing and operating a defense against dark interference in the collective, ethereal psyche of the Aryan collective. It is the crux of the occult war, accentuated by psychotronic weapons. We practice White Magic to strengthen the collective and fend off Black Magic. This is an important aspect of the work of AIS, as the program deals with the everyday well-being of the collective. We have sworn an oath, when we first incarnated, the White Vow, that we will never tolerate evil in the world, and that we will combat and eradicate evil, wherever it arises.

5. Resistance to Skynet

- This program relates to the two previous programs on occult geopolitics and astral war. The program seeks to gain allies in academia, military and politics in the fight against psychotronic weapons, and to lay the ground for the Research Institute for Spiritual Energies (RISE) and Project Spearhead Industries (PSI), theoretical and applied science divisions of the Aryan Academy (AA). We gather intel and develop spiritual programs that might help us in alleviating and resisting the effects of psychotronic weapons, eventually being able to defend ourselves fully in the research and development programs of RISE and PSI.

6. Project Blue Tone

- In this project, we study the aforementioned Blue Tone phenomenon. If we are able to send signals, sound and visions to ourselves from the future, it would equally be our task in the present to develop such a technology and program. This is why we want to develop the Blue Tone Military Headquarter to carry out experiments in spiritual time-travel. Highly occult phenomenon. Is the phenomenon caused by a combination of transcendental reality and advanced technology? As far as we currently concerned, there must be technology involved, for we are pretty well aware of how the purely transcendental realm works. So we deal here with spiritual time-travel *in temporality*.

7. Aryan National Party (ANP) and Nordic Alliance (NA)

- This program is set up to develop our two main conceptual political parties. The idea is that we establish a core political party for the few Aryans (Siddhas), the ANP, and a broader supportive party for all our allies, the NA (Viryas). The agenda of these two parties is to build the White Order. Furthermore, we plan to build similar alliance parties in all regions of the world, for example the Asian Alliance etc.. The idea is to create unity among our allies, and for the world to eventually be ruled by these regional alliance parties in a new golden age of White Order Regency. Learn more about the White Order and our masterplan in Riis-Søndergaard (2025g; 2025h). Remember, we are a perfectly peaceful and spiritual movement with the goal of liberating mankind.

B. Intel Studies

1. The Archive

- Here we collect all the intel and reports of AIS for easy recovery, research and reference. Combined physical and digital archive.

2. Studies in Freemasonry, Illuminati and Other Occult Groups

- The idea of this investigative project is to gather data and intel on the history, ideology, agenda and workings of these important players in the occult geopolitics. We seek to understand what are their motives, what is their agenda and how do they operate. How has their political, psychological and cultural influence left their mark on history? The program could be expanded to investigate other important groups and organizations.

3. Studies in the Deep State

- A study of how the Deep State operates globally. Who are the main players in government and in private organizations and corporations? Should create real-time data on the structure, operations and developments of the global Deep State, for example trans-national alignments, networks and influence.

4. Studies in Parapolitics and Covert Operations

- Studies in the history of covert operations. Should be kept updated with the latest intel on current covert operations, carried out by various important players. For an introduction to parapolitics/deep politics, see the work of Peter Dale Scott, for example (1996).

5. Studies in Black Projects

- Studies in the top-secret underworld of Black Projects. Classification of known projects and gathering intel on less known projects etc.. What is being worked on in these projects, especially as they pertain to psychotronic and occult warfare? What is the technological status-quo of these projects? Where are they heading?

6. Studies in Political Psychology and PSYOPS

- Investigation of historical examples of the use of psychology in occult geopolitics, also known as PSYOPS. Basic research in the psychological mechanisms of mankind and how these have been used to further the goals of deep political actors worldwide.

7. Studies in the Resistance

- Analysis of strategic counter-movements, groups and organizations. Gathering intel on the agenda and structure of the global resistance.

Notes on agenda

Let's take a deep breath and consider the absolute seriousness and urgency of what we have presented in this essay on the AIS investigative index. Of course, almost no one could possibly speak with such clarity and authority about the occult war of the 21st ct. as the AO itself, for first of all, we are the transcendental, ethereal race, and second, we are the true promise of all spiritual enlightenment and liberation. In all our essays, we describe the modern day ethereal life of the Aryans, while we strategize on the fight for freedom and liberation. As Evola (2002) said: "There is today not a field, where the occult war has not been undertaken". The reason that we write and publicize our essays is to inform our allies and all good people of what is going on in the subterranean level of geopolitics, where the AO must be seen as the primary organized resistance to what is commonly called the technocratic New World Order (NWO) and their plan for "the technological singularity". Is it not an immense hypocrisy of the NWO, when they on the one hand promise a technological utopia, merging with machine, but on the other hand, vehemently attack the crown-chakras and collective psyche of the AO? What kind of utopia is that, where they need to paralyze and cause chaos in the crown-chakras of the most enlightened and liberated Siddhas? Of course, that scenario is deeply outrageous and exactly why we need to and are building a resistance. But of course, they even deny that the Siddhas exist, that the crown-chakra and other highly divine spiritual energies exist at all. They probably do so, because they do not have these spiritual energies themselves, and why do they not possess these energies? Probably because they don't belong in the aether – they don't belong in origin. Most likely, instead of having higher spiritual faculties, they operate merely on *the reptilian brain* in a sort of reductionist notion of what is life. So when they only have a reptilian brain, it seems obvious why they would suppress the AO and other spiritually advanced beings, who claim to experience highly advanced spiritual energies and states of being. But not only do they deny the existence of the crown-chakra, no, they *relentlessly attack* that very crown-chakra of the Siddhas with psychotronic weapons and without mercy. Actually, the attacks are becoming more and more severe. Why? Because they fear the true spiritual masters, our organization, and the good news we seek to bring to the good mankind. They fear the plan of the Hyperborean Siddhas to bring all good people back to origin – *the new ethereal Atlantis*. This is the end-game, and why the occult war at current is so fierce. So the spiritual reality of existence is absolutely true, and so is the reality of the occult war – this is the point we would like to make in this essay on the investigative index. By presenting the core index of AIS, we inform good people of what is going on in and what is the current agenda of the deepest of the resistance to the soulless machinery of the NWO. We were told in the occult that "the system is the NWO enforced by Tesla-towers". This is exactly what we seek to resist and build a defense to. Is it not an honorable goal to resist having our crown-chakras violated in the most gruesome and evil manner? We don't think anyone could openly disagree with us on the honor of our mission, but hence why the powers-that-be could never talk about the reality of the occult war, for they would then reveal their own complicity in the most vile hatred and aggression against the most loving of people, the Hyperborean Siddhas organized in the AO/IDA. We would like to end this important essay with a call out to all our allies in the resistance, in the White Order. Should we not align with the cause and unite in the resistance against such a vile, inhumane and speculative evil as psychotronic warfare. As the political-spiritual elite in Russia says: "Psychotronic weapons are warfare against God". We wholeheartedly agree with this proposition. The current geopolitical discourse is so skewed as to portray our closest ally in the fight against psychotronic weapons, Russia, as the worst international criminal, when the truth is that the European leaders are, most likely knowingly, complicit in the worst crimes against humanity ever by letting the Black Projects attack the spiritual energies and collective psyche of the Siddhas. Do indeed see our other essays and our general plan to establish the Aryan Academy, if you want to know more about our plan.
